R900 + WA08

See

Capture and send image
of objects

Real-Time Image Capture - See It

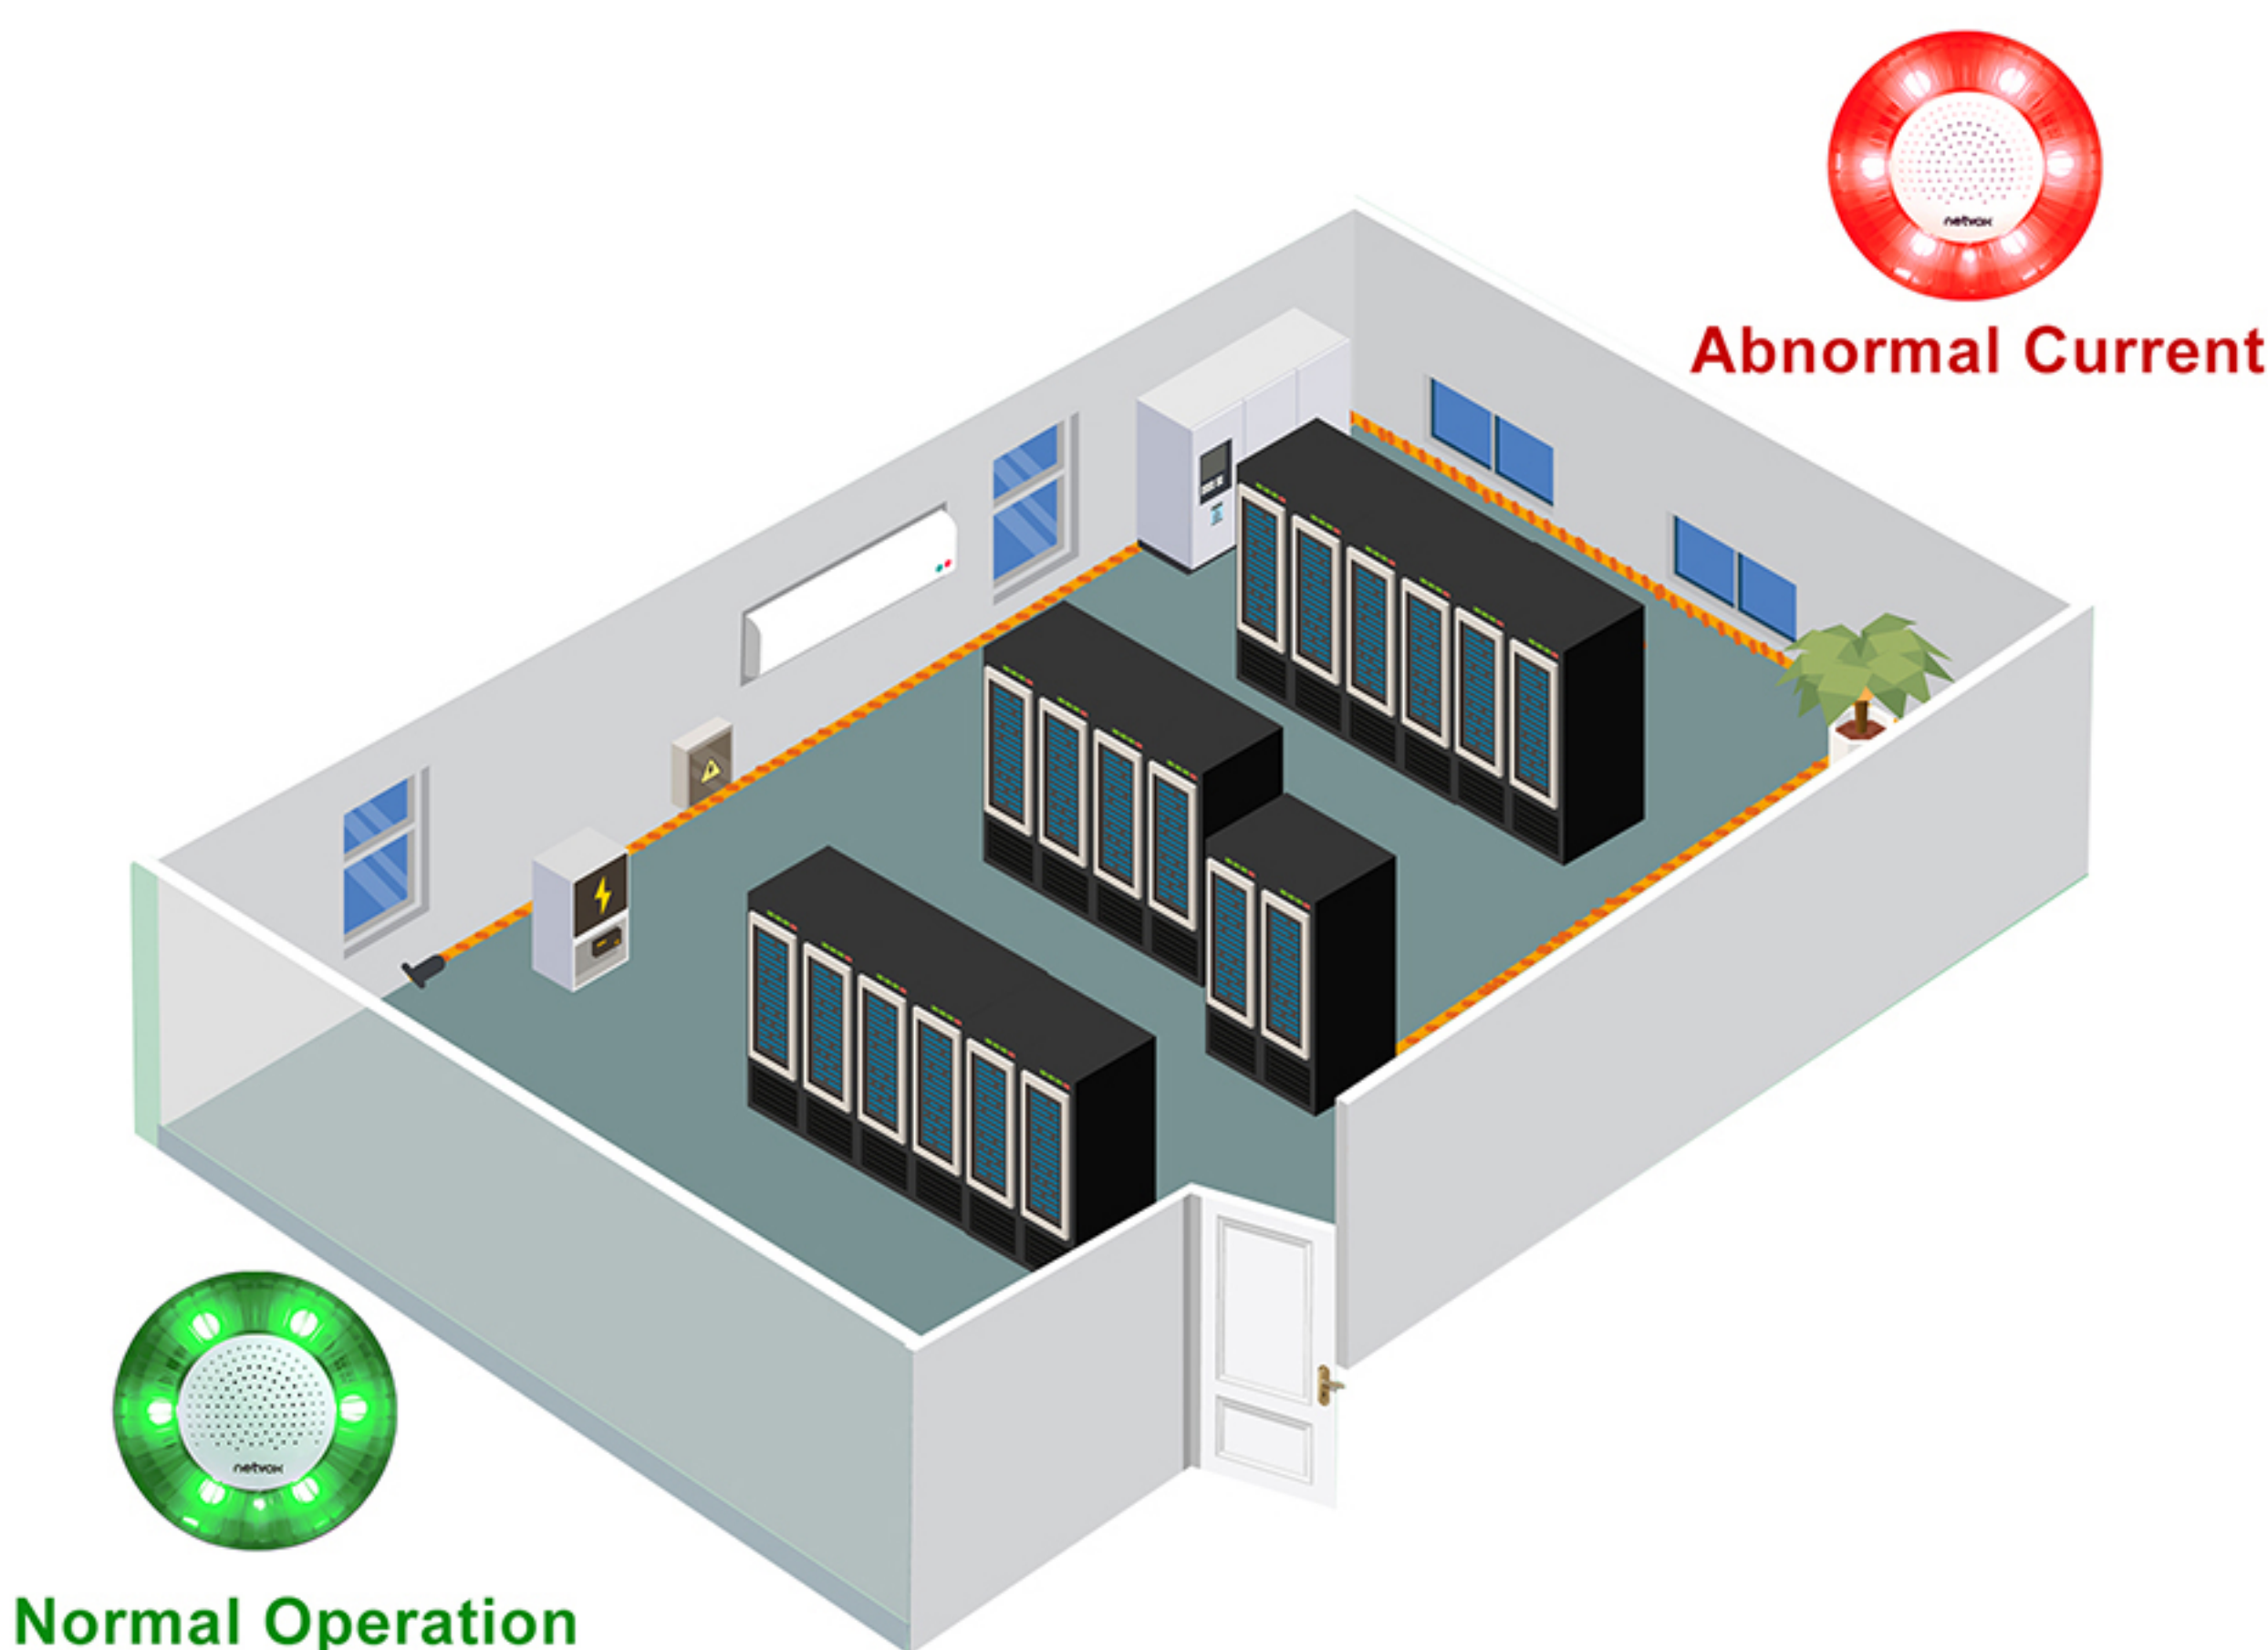

When R900 detects an anomaly, it immediately triggers the **WA08A WiFi Camera** to capture a snapshot of the scene and sends it directly to your mobile app or a third-party IoT platform. No matter where you are, you can view the situation in real time, ensuring security is always visible.

R900 + R603

Hear

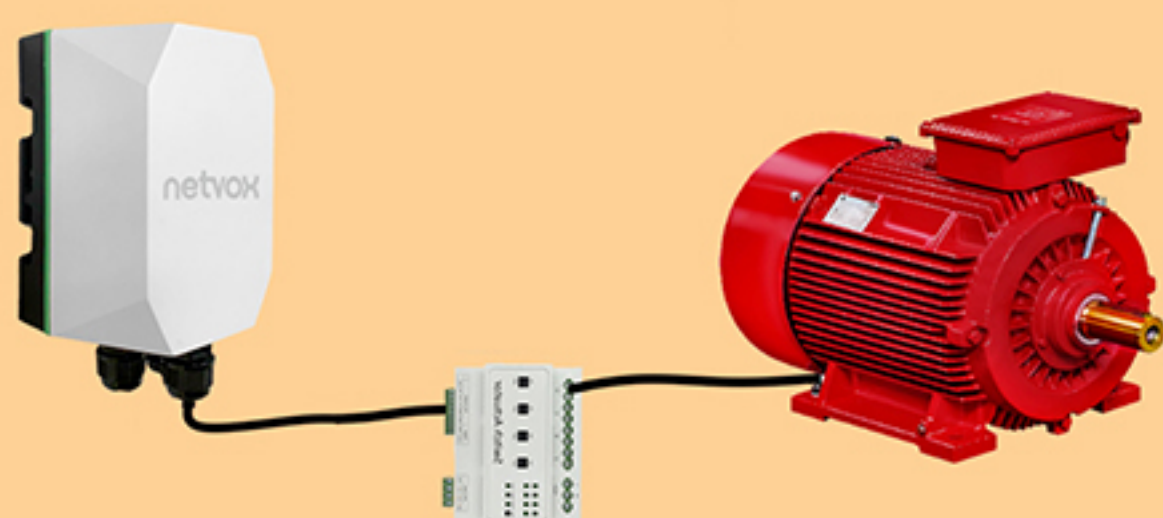

Sound custom alarm to notify people

Immediate Audio Alarm - Hear It

If R900 detects values exceeding a preset threshold, the **R603 Alarm** will immediately emit a loud sound, alerting you or anyone nearby to potential danger, helping to prevent further escalation.

R900 + 3rd-Party Device

Linkage

Get 3rd-party device connected through dry contact

Automated Device Control - Act On It

R900 features built-in dry contact relays that allow it to automatically trigger third-party devices, ensuring a fast and effective response during critical situations.
