1. Introduction

RA0716_R72616_RA0716Y is a Class A type device based on the LoRaWAN open protocol of Netvox and is compatible with the LoRaWAN protocol. RA0716_R72616_RA0716Y can be connected with the sensor of the temperature and humidity and PM2.5. The values collected by the sensor are reported to the corresponding gateway.

LoRa Wireless Technology:
LoRa is a wireless communication technology dedicated to long distance and low power consumption. Compared with other communication methods, LoRa spread spectrum modulation method greatly increases to expand the communication distance. Widely used in long-distance, low-data wireless communications. For example, automatic meter reading, building automation equipment, wireless security systems, industrial monitoring. Main features include small size, low power consumption, transmission distance, anti-interference ability and so on.

LoRaWAN:
LoRaWAN uses LoRa technology to define end-to-end standard specifications to ensure interoperability between devices and gateways from different manufacturers.
2. Appearance

Figure 1 RA0716

Figure 2 R72616

Figure 3 RA0716Y
3. Main Feature

- Compatible with LoRaWAN
- RA0716 and RA0716Y applies DC 12V adapters
- R72616 applies solar and rechargeable lithium batteries
- Simple operation and setting
- PM2.5 temperature and humidity detection
- Adopt SX1276 wireless communication module

4. Set up Instruction

On/Off

<table>
<thead>
<tr>
<th>Power On</th>
<th>RA0716 and RA0716Y are connected to DC 12V adapter for power on. R72616 applies solar power and rechargeable lithium batteries.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Turn On</td>
<td>Connect with power on to turn on</td>
</tr>
<tr>
<td>Restore to Factory Setting</td>
<td>Press and hold the function key for 5 seconds, and the green indicator flashes 20 times.</td>
</tr>
<tr>
<td>Power Off</td>
<td>Disconnect from the power supply</td>
</tr>
</tbody>
</table>

Note

1. The engineering test requires to write the engineering testing software separately.
2. The interval between on and off is suggested to be about 10 seconds to avoid the interference of capacitor inductance and other energy storage components.

Network Joining

<table>
<thead>
<tr>
<th>Never Join the Network</th>
<th>Turn on the device to search the network. The green indicator keeps on for 5 seconds: success. The green indicator remains off: fail</th>
</tr>
</thead>
<tbody>
<tr>
<td>Had joined the network (Not in the original setting)</td>
<td>Turn on the device to search the previous network. The green indicator keeps on for 5 seconds: success. The green indicator remains off: fail.</td>
</tr>
<tr>
<td>Fail to Join the Network</td>
<td>Suggest checking the device registration information on the gateway or consulting your platform server provider if the device fails to join the network.</td>
</tr>
</tbody>
</table>
**Function Key**

<table>
<thead>
<tr>
<th>Description</th>
<th>Function</th>
</tr>
</thead>
</table>
| Press and Hold for 5 Seconds | Restore to the original setting / Turn off  
The green indicator flashes 20 times: success  
The green indicator remains off: fail |
| Press once | The device is in the network: the green indicator flashes once and the device sends a data report  
The device is not in the network: the green indicator remains off |

**Low Voltage Threshold**

<table>
<thead>
<tr>
<th>Description</th>
<th>Value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Low Voltage Threshold</td>
<td>10.5 V</td>
</tr>
</tbody>
</table>

**Threshold Restore to Factory Setting**

<table>
<thead>
<tr>
<th>Description</th>
<th>Explanation</th>
</tr>
</thead>
<tbody>
<tr>
<td>RA0716_R72616_RA0716Y</td>
<td>Has the function of the power-down saving the memory of network-joining information. This function acquiesces in turn off, that is, it will rejoin every time when it is power on. If the device is turned on by the ResumeNetOnOff command, the last network-joining information will be recorded when every time it is power on. (including saving the network address information that it is assigned, etc.) If users want to join a new network, the device needs to perform the original setting, and it will not rejoin the last network.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Operation Method</th>
<th>Steps</th>
</tr>
</thead>
</table>
| RA0716_R72616_RA0716Y | 1. Press and hold the binding button for 5 seconds and then release (release the binding button when the LED flashes), and the LED flashes 20 times.  
2. The device automatically restarts to rejoin the network. |
5. Data Report

After power on, the device will immediately send a version packet report and the data report including the temperature, humidity, PM2.5 and voltage.

The device sends data according to the default configuration before any other configuring.

ReportMaxTime:

RA0716_RA0716Y is 900s,
RA72616 is 1800s (subject to original setting)
* MaxTime cannot be set less than 15 min
* The value of the ReportMaxTime should be greater than ReportType count *ReportMinTime+10

ReportMinTime:

30s (US915, AU915, KR920, AS923, IN865)
120s (EU868)

ReportType count = 1

Note:

(1) The cycle of the device sending the data report is according to the default.
(2) The interval between two reports must be the MaxTime.
(3) ReportChange is not supported by RA0716_R72616_RA0716Y (Invalid configuration). The data report is sent according to ReportMaxTime as a cycle (the first data report is the start to the end of a cycle).
(4) Data pocket: PM2.5, voltage, temperature and humidity.
(5) The device also supports the TxPeriod cycle configuration instructions of Cayenne. Therefore, the device can perform the report according to the TxPeriod cycle. The particular report cycle is ReportMaxTime or TxPeriod depending on which report cycle was configured last time.
(6) It would take 35 seconds for the sensor to sample and process the collected value after pressing the button, please be patient.

The device reported data parsing please refer to Netvox LoraWAN Application Command document and Netvox Lora Command Resolver http://loraresolver.netvoxcloud.com:8888/page/index

(1) Configure RA0716 device parameter MinTime = 30s, MaxTime = 900s

Downlink: 0135001E03840000000000

Device Return:

8135000000000000000000 (configuration success)

8135010000000000000000 (configuration failure)

*Note:

The value of MinTime should be $\geq 30s$ (US915, AU915, KR920, AS923, IN865)

The value of MinTime should be $\geq 120s$ (EU868)

The value of MaxTime should be $\geq 900s$

(2) Read RA0716 device parameter

Downlink: 0235000000000000000000

Device Return:

8235001E03840000000000 (device current parameter)
6. Installation

1. RA0716 does not have the waterproof function. After the device completes joining the network, please place it indoor.

2. R72616 has a waterproof function. After the device completes joining the network, please place it outdoors.

   (1) In the installed position, loosen the U-shaped screw, the mating washer and the nut at the bottom of R72617, and then make the U-shaped screw pass through the appropriate size cylinder and fix it on the fixing strut flap of R72616. Install the washer and the nut in order and lock the nut till R72616 body is stable and does not shake.

   (2) At the upper side of the fixed position of R72616, loosen the two U-shaped screws, the mating washer and nut on the side of the solar panel. Make the U-shaped screw pass through the appropriate size cylinder and fix them on the main bracket of the solar panel and install the washer and the nut in sequence. Lock nut till the solar panel is stable and does not shake.

   (3) After adjusting the angle of the solar panel completely, lock the nut.

   (4) Connect the top waterproof cable of R72617 with the wiring of the solar panel and lock it tight.

(5) Rechargeable lithium battery

   R72616 has a battery pack inside. Users can buy and install rechargeable 18650 lithium battery, a total of 3 sections, voltage 3.7V/ every single rechargeable lithium battery, recommended capacity 5000mah. The installation of rechargeable lithium battery steps are as follows:

1: Remove the four screws around battery cover.

2: Insert three 18650 lithium batteries.  (Please make sure the positive and negative level of the battery)

3: Press the activation button on the battery pack for the first time.

4: After activation, close the battery cover and lock the screws around battery cover.
3. **RA0716Y** is waterproof and can be placed outdoors after the device completes joining the network.

   (1) In the installed position, loosen the U-shaped screw, the mating washer and the nut at the bottom of RA0716Y, and then make the U-shaped screw pass through the appropriate size cylinder and fix it on the fixing strut flap of RA0716Y. Install the washer and the nut in order and lock the nut till RA0716Y body is stable and does not shake.

   (2) Loosen the M5 nut at the bottom of the RA0716Y matte and take the matte together with the screw.

   (3) Make the DC adaptor pass through the central hole of the bottom cover of RA0716Y and insert it into the RA0716Y DC socket, and then put the mating screw to the original position and lock the M5 nut tight.
7. Important Maintenance Instruction

The device is a product with superior design and craftsmanship and should be used with care.

The following suggestions will help you use the warranty service effectively.

• Keep the equipment dry. Rain, moisture and various liquids or water may contain minerals that can corrode electronic circuits. In case the device is wet, please dry it completely.

• Do not use or store in dusty or dirty areas. This way can damage its detachable parts and electronic components.

• Do not store in excessive heat place. High temperatures can shorten the life of electronic devices, destroy batteries, and deform or melt some plastic parts.

• Do not store in excessive cold place. Otherwise, when the temperature rises to normal temperature, moisture will form inside which will destroy the board.

• Do not throw, knock or shake the device. Treating equipment roughly can destroy internal circuit boards and delicate structures.

• Do not wash with strong chemicals, detergents or strong detergents.

• Do not paint the device. Smudges can make debris block detachable parts up and affect normal operation.

• Do not throw the battery into the fire to prevent the battery from exploding. Damaged batteries may also explode.

All the above suggestions apply equally to your device, batteries and accessories.

If any device is not operating properly.

Please take it to the nearest authorized service facility for repairing.
